Not illustrated. 1895 Excerpt: .and, in the later stages, the application of the caliper-splint, which is used as a walking appliance. 3. Treatment Op Cases Of Deformity. Verv few cases of angular deformity are treated as outpatients for this condition itself; it is preferred to send them into the hospital for the correction of the deformity, which is accomplished either by traction or operation. In the cases in which the deformity has lasted but for a short time, and is due to muscular spasm, the leg is brought into the extended position by means of gradual traction, carried out as nearly as possible in the line of the deformity. 4. Treatment By Operation. Operation is performed in those cases in which the deformity has existed for a long time, and is not due to muscular spasm, but to adhesions and contractions about the joint as the result of disease. The...
