Excerpt: . grower must strike the balance for himself--the facts being, that the yield is from one-fourth to one-third as great as carrots, and from one-fourth to- one-fifth as great as mangolds, while they require but a fraction of the care in cultivation and gathering, that either of these crops do. VARIETIES OF SQUASHES. Owing to the great tendency in the varieties of the Cucurbitaceous Family to cross with each other, hybrids are very common. Seed planted the first season after the crossing has been made, will usually produce a greater crop than either of the parent kinds, and individual squashes will be superior in quality to either of the parents; yet, as a rule, hybridization is not desirable, for, after the first season, there is a deterioration in the quality, below the average of the parent kinds, while the mixed varieties are not so...
