paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 103 Publisher: China Construction Industry Pub. Date :2009-09-01 first edition this book with Mechanics of Materials courses Undergraduate teaching materials supporting the use of experimental teaching materials. Book writing process. focusing on the characteristics of the experimental teaching mechanics of materials. in each experiment. the purpose of the experiment. the experimental principle. design of experimental design methods. precautions. reporting requirements and test questions are more detailed thinking narrative and the more stringent requirements. The book is divided into five chapters. Chapter 1 Introduction. a brief description of the significance of experimental mechanics of materials. tasks and experimental requirements; second chapter basic experiments. including experiments and major destructive determination of mechanical properties. etc.; The third chapter is a comprehensive design of experiments. including combination of composite beam deformation experiments and experiments; Chapter innovation-enhancing experiments. including the statically indeterminate structure. the stress components in the eccentric load analysis and experimental testing of certain projects; Chapter commonly used in test equipment and instruments. Appendix lists the experimental data processing. the main mechanical properties of materials commonly used parameters. mechanical properties testing of the relevant national standards and test reports. This book can serve as institutions of higher learning civil engineering. mechanical. water. aviation. shipbuilding and other professional and more hours of experimental mechanics of materials teaching materials. experimental mechanics of materials can be used as a separate set hours of teaching books. but also for research in materials engineering and technical personnel strength for reference. Contents: Chapter 1 Introduction Section I of sense of experimental mechanics of materials and tasks Code Section III experiment students test the basic experimental procedures Chapter Section II reversed tension and compression test experimental elastic...
